WHO PAYS MEDICAL BILLS AFTER A CAR ACCIDENT?

The answer depends on the type of insurance that you have, like medical payments coverage (“med-pay”) on your auto policy. That will pay for your medical treatment up to limits of the coverage. Your health insurance may cover some of your medical bills but will look to the auto insurer to reimburse them from your settlement. If you don’t have either med-pay or health insurance, we will work with our network of medical specialists to get you treated and arrange to pay the bills at the end of your case. This can be a very complicated process—one that you cannot do on your own. [Contact us](#) today so that we can help you receive the medical treatment you need – no matter your insurance coverage.

Did You Know...? Interesting Facts about Hummingbirds!

Hummingbirds are fascinating little birds with long beaks and fast-moving wings. They are amazingly adapted pollinators, and they play an important role in pollination. They can be seen darting around nectar feeders and flowers across the U.S. But how much do you actually know about these tiny, feathered friends?

- The name hummingbird comes from the humming noise their wings make.
- They are the only birds that can fly backwards.
- They are the smallest migrating bird.
- They typically travel alone and can fly up to 500 miles at a time.
- The average weight of a hummingbird is less than a nickel.
- Their legs are only used for perching and moving sideways while perched. They can’t walk or hop.
- The average number of eggs laid by female Hummingbirds is two. These eggs have been found in nests smaller than a half dollar and are the size of a jellybean or smaller.
- There are over 360 species of hummingbirds in North and South America.
